

ENERGY - OPPORTUNITY - GROWTH

EOG Resources, Inc. (NYSE: EOG), one of the largest oil and natural gas companies in the United States, has earned a reputation for our dynamic production growth through the drillbit – year after year. We are currently seeking the following position to support our Stanley, ND office.

Field Production Superintendent

Responsibilities include managing field production operations including, but not limited to, daily production, injection/disposal well operations, surface equipment installation and maintenance, well bore maintenance and repairs, and chemical treatment programs. Additional duties include providing support as necessary for production engineering, production administration/materials, HSE, development drilling/exploration and affiliate pipeline operations staff as well as supervise company and contract field production staff for large scale (40MBOPD±) oil field operation.

Requires a high school diploma or GED and a minimum of 15 years of oil production operations experience with 2 years of supervisory experience preferred. Must have a strong background in oil well artificial lift techniques, particularly rod pump and electric submersible applications; basic knowledge of Federal and State production operations rules and regulations; ability to effectively communicate in a multi-disciplinary environment; cost and personnel management skills; and good math, computer and organizational skills. Experience with gas lift technology would also be highly beneficial.

Position will be filled at a level commensurate with experience. Position will be located in the Stanley, ND area.

Qualified applicants please apply online at www.eogresources.com.

No phone calls, please.
